Investigative Question: How do the different organs and organ systems work interdependently to sustain health of a living organism?

Introduction: (2 full paragraphs)
- Why do we use the fetal pig to study human anatomy?
- What is the significance of the investigative question?

Hypothesis: (1 paragraph)
- What were your initial thoughts about the answer to the investigative question?

Methods:
- What types of observations did you look at?
- How were the incisions performed?
- What were some of the mini-experiments you conducted?

Results:
- Include your observations – they must be organized and typed.
- Include dissection photos – all organs and organ systems must be labeled accurately.

Discussion:
- Was your hypothesis correct? Why or why not?
- What were some of the evidences you found in your autopsy that answered the investigative question?
- What are further questions for investigation that you still have?
- Include revised answers of all 15 questions you’ve done this week.
